You are about to purchase a product that is not simple and may be difficult to understand.

This key investor information is accurate as at 3I December 2017

# What is this product?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The product offers a range of underlying investment options with risk classes ranging from 1 as the lowest and 6 as the highest. The risk and return of the investment varies on the basis of the chosen underlying investment option.

Level 1:	This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact our capacity to pay you.			
Level 2:	This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.			
Level 3:	This rates the potential losses from future performance at a medium low level, and poor market conditions are unlikely to impact our capacity to pay you.			
Level 4:	This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.			
Level 5:	This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely to impact the capacity to pay you.			
Level 6:	This rates the potential losses from future performance at a high level, and poor market conditions are very likely to impact the capacity to pay you.			

However, this protection against future market performance will not apply if you fail to make your payments in time.

The performance of the product, outside of the death scenario, is highly correlated with the performance of the chosen underlying investment option.

Information regarding risk and return, and performance of the investment options can be found in the accompanying Key Investor Document of your chosen Underlying Investment Options. This document is also available at www.cnpcyprialife.com.

This product does not include any protection from future market performance so you could lose some or all of your investment.

# What happens if CNP CYPRIALIFE is unable to pay out?

This product is not covered by any compensation or guarantee scheme and therefore losses could result to your investment.

# What are the costs?

The costs that you are due to pay, including costs associated with future variations to the underlying investment options will depend on policyholder's underlying investment options choices.

Information regarding costs can be found in the accompanying Key Investor Document of your chosen Underlying Investment Options. This document is also available at www.cnpcyprialife.com.

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest €1,000 each year. The figures are estimates and may change in the future.

Table 1: Costs over time				
Investment scenarios (€1,000 per year)	If you cash in after 1 year	If you cash in after 10 years	If you cash in after 20 years (recommended)	
Total costs	n/a	€2.654	€6.521	
Impact on return (RIY) per year	n/a	2,65%	1,63%	

## Table 2: Composition of costs

The table below shows:

• the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period what the different cost categories mean.

One-off costs	Entry costs	0,25%	The impact of (This is the m
	Exit costs	0,0%	The impact of
Ongoing	Portfolio transaction costs	*	The impact of
costs	Cost of Insurance	1,14%	The impact of
	Other ongoing costs	0,24%	The impact of
Incidental costs	Performance fees	0,0%	The impact of outperforms in

\* It is included in the Key Information Document of your chosen Underlying Investment Options

# How long should I hold it and can I take my money out early?

### Recommended holding period: 20 years

This product has no required minimum holding period but is designed for long term investment; you should be prepared to stay invested for at least 20 years. You can disinvest all or part of your investment at any time before or after the recommended holding period.
